Change

talklistenchange.org.uk/workplace

Businesses lose £316 million each year due to domestic abuse related absences.* With the right policies and support networks in place, you can ensure your staff know where to turn when difficulties arise at home.

We can help you build your commitment to supporting staff and tackling domestic abuse (DA) through:

- Helping you write and embed domestic abuse policies
- Delivering bespoke training packages for line managers
- Supporting managers who have staff experiencing DA
- Supporting internal DA awareness events

Visit our website for more information and submit an enquiry about getting domestic abuse support at your workplace.
